JAMES A. GRAASKAMP COLLECTION OF TEACHING MATERIALS

- V. INDUSTRY SEMINARS AND SPEECHES SHORT TERM
 - A. Appraisal Organizations
 - 5. 1973
 - c. "A Guide to Feasibility Analysis", sponsored jointly by University of Michigan and Grand Rapids Chapter of SREA, May 23, 1973

A GUIDE TO FEASIBILITY ANALYSIS

A Seminar at Grand Rapids, Michigan University of Michigan Extension Service and

Grand Rapids Chapter of the Society of Real Estate Appraisers Wednesday, May 23, 1973

Instructed by Professor James A. Graaskamp University of Wisconsin School of Business

MORHING SESSION: 9:00 A.M.

- 1. Real Estate as an Enterprise and the Management Process
- II. Elements of a Total Feasibility Analysis
- III. Elements of Financial Feasibility

COFFEE BREAK - 10:30

- IV. The Concept of Risk
- V. Determining Objectives and Criteria of the Client
- VI. Structuring Market Data Analysis With Models

LUNCHEON - 12:00

AFTERNOON SESSION: 1:00 P.M.

- 1. Market Segmentation and Identification of Prospective Buyers or Tenants
- II. Developing a Customer Profile With a Consumer Survey
- III. Pre-Architectural Programming

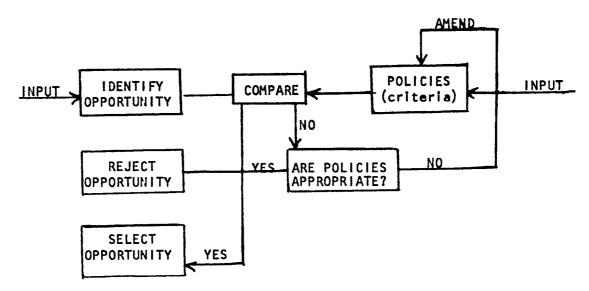

COFFEE BREAK - 2:30

- IV. Structuring the Financial Analysis
- V. Modeling Cash Flow Simulation for Rental Properties
- VI. Evolution of Concepts for Measuring Rate of Return
- VII. Risk Evaluation

FEASIBILITY ANALYSIS SEMINAR OUTLINE

May 23, 1973 Grand Rapids, Michigan

- 1. Real Estate as an Enterprise and the Management Process
 - A. Traditional Sequence of Management Function:
 - 1. Planning
 - 2. Organizing
 - 3. Directing
 - 4. Controlling
 - B. Modern Management Theory treats any undertaking which is organized to accomplish a purpose as an enterprise. The functional steps in a systematic enterprise are:
 - 1. Goal-setting
 - 2. Forming policies
 - 3. Searching for opportunities which are consistent with policies
 - 4. Selecting opportunities which are consistent with policies
 - 5. Designing systems for capturing selected opportunities
 - 6. Installing systems for capturing selected opportunities
 - 7. Operating the systems that have been installed
 - 8. Maintaining and continuously perfecting the operating systems

- C. This list suggests a flow of events, the presence of standards or policies for go or no-go decisions, and hints at the presence of feedback as part of a dynamic systems process.
 - 1. Feasibility analysis will be concerned primarily with the first five functions
 - 2. Many enterprises are cash cycle enterprises

- D. Real estate is a special case of the cash cycle enterprise because:
 - 1. The length of the time cycle is so long
 - 2. The enterprise and the tools are so similar
 - 3. The nature of real estate as an economic good space over time and money over time
 - 4. A real estate project as an assembly of sub-systems
- E. In the language of systems the basic elements are:
 - 1. Existing conditions a specific location or quantity referred to as levels, reservoirs or states.
 - 2. Action is a change from one level or state to another and is measured by flow rates.
 - 3. Choices reflect alternative flow rates which can be controlled or selected and changing the flow rate is a decision.
 - 4. Information channels carry messages about states and flow rates which lead to decisions to modify to achieve some objective or criterion.
 - Feasibility analysts are typically involved in identifying and measuring flow rates and their probable patterns in light of some decision.
- F. There are three types of information which affect the decision:
 - 1. Outside information about alternatives which is generally available to inquiry or can be generated by inference from observed behavior.
 - 2. <u>Inside information</u> which is the product of information flows internally generated from the experience of the organization and internal values and objectives.
 - 3. <u>Intuitive information</u> which relates to the perceptions, skills, and bias of the decision maker.
 - 4. Appraisal tends to ignore the latter two while feasibility analysis generally begins with the latter two.
- G. The systems engineer sees the eventual form of an enterprise, in terms of both its configuration and behavior, as representing a negotiated concensus between two general sources of power the power of the environment to dictate form and behavior of the organization on the one hand and the power of the organization to decide for itself what its characteristics and behavior will be on the other.
 - 1. Put in another way, that of the designer, one must judge the success of a work of art by matching its form to its context.
 - Context is that part of the environment which will not change and to which one must adapt or one must achieve. A firm objective is as much a constraint as unchangeable zoning.
 - Form is concerned with those elements of the environment which can be molded, adapted, or assembled to fit the critical requirements and objectives of the context.

- 4. Success is evaluated by the fit of form to the critical elements of context an ensemble which first requires identification of the context or problem to be solved.
- 5. The systems concept of the firm as a concensus between forces and the artists idea of form in context then leads to this definition of feasibility:

"A real estate project is 'feasible' when the real estate analyst determines that there is a reasonable likelihood of satisfying explicit objectives when a selected course of action is tested for fit to a context of specific constraints and limited resources."—

James A. Graaskamp

II. Elements of a Total Feasibility Analysis

The basic forces or elements of context which make a feasibility problem manageable also lead to understanding of the proper report titles as it is seldom that one does a complete feasibility study as a single report.

- A. The subject matter can be classified as:
 - 1. Strategic objectives and tactics (policies)
 - 2. Market trends and opportunity areas
 - 3. Merchandising targets with monopoly characteristics
 - 4. Legal-political constraints
 - 5. Ethical-esthetic constraints
 - 6. Physical-technical constraints
 - 7. Financial constraints
- B. These elements also name the report type:
 - 1. Strategy study: selection of objectives, tactics, and decision criteria.
 - 2. Market analysis: economic base studies or other related aggregate data review.
 - 3. Merchandising studies: consumer surveys, competitive property analysis, marketability evaluation, etc.
 - 4. Legal studies: opinion on potential legal constraints, model contracts or forms of organization, and political briefs.
 - 5. Compatability studies of project to community planning, conservation standards, or other public policies.
 - 6. Engineering, land planning, and architectural studies.
 - 7. Financial studies: economic modeling, capital budgets, present value and discounted cash flow forecasts, rate of return analysis, financial packages.
- C. The report types also suggest the potential contribution by other specialties and the basic character of a statement of limiting conditions.
 - 1. The analyst as an expert on experts
 - 2. Synthesis of all reports in the financial report
 - 3. Real estate as a set of assumptions and permission of the client as to which set of assumptions are acceptable as provided by others.

III. Elements of Financial Feasibility

- A. Identification of selected profit centers
- B. Specification of the common denominator a time line schedule of outlays and receipts
- C. The capital budget (source & application)
 - 1. Construction costs
 - 2. Carrying costs
- D. Operating budgets (source & application)
 - 1. Pattern of sales revenues
 - 2. Fixed management costs
 - 3. General sales costs and investment
- E. Financing plan
 - 1. Credit amounts and terms
 - 2. Equity amounts and terms
 - 3. Holding power
- F. Profits classified as to type and tax
 - 1. Cash from operations
 - 2. Cash from capital gains
 - 3. Cash surplus from financing
 - 4. Cash from tax savings on other income
 - 5. Cash from reduction or shift of fixed outlays
 - 6. Indirect non-cash benefits
- G. Selected measures of profitability
 - 1. Definition of investment
 - 2. Definition of profit
- H. Selected measures of risk
 - 1. Payback periods
 - 2. Capacity for variance
 - 3. Variance control
- IV. Modern management defines risk as the potential variance between expectations and realizations, i.e., between pro forma prospects and balance sheet and P & L statements.
 - A. Dynamic risks can produce profit or loss and are best controlled by the finesse of management execution of a plan.
 - B. Static risks are those which can only cause a loss due to surprise upset of a plan.

- C. Pisk management has two objectives:
 - 1. Conservation of existing enterprise assets despite surprise events
 - 2. Realization of budgeted expectations despite surprise events
- D. The process of risk management involves:
 - 1. Identification of significant exposures to loss
 - 2. Estimation of potential loss frequency and severity
 - 3. Identification of alternative methods to avoid loss
 - 4. Selection of a risk management method
 - 5. Monitoring execution of risk management plan
- E. Alternative methods for surviving potential risk losses:
 - 1. Eliminate risk exposure
 - 2. Reduce frequency or severity of accident
 - 3. Combine risks to increase predictability (reserves for expenses)
 - 4. Shift risk by contract (subcontracts or escape clauses)
 - 5. Shift risk by combination by contract (insurance)
 - 6. Limit maximum loss (corporate shell or limited partnership)
 - 7. Hedging
- V. Determining Objectives and Criteria of the Client
 - A. Feasibility consultant has three alternative situations:
 - 1. A site or product in search of a user
 - 2. A specific consumer in search of a site and a product
 - 3. A specific client in search of an opportunity in real estate
 - B. Analytical point on the time line relative to fixed assumptions and viewpoint of report.
 - C. Establishing the viewpoint of the reader who will be making a decision on the basis of the report:
 - 1. Strategy of equity vs credit
 - 2. Strategy of owner vs user vs public interest
 - 3. Value-objectives-criteria of viewpoint to be served
 - 4. Profit centers defined within measures of profitability
 - 5. Desirability of supplementary reports
 - D. The basic issue of any research methodology:
 - 1. What is the question?
 - 2. What data is available which is relevant?
 - 3. What theory is available to focus data on the question?
 - 4. How will the results be communicated?
 - 5. What are the abilities of the analyst?
 - 6. What's the cost benefit ratio between the method and the question?
 - E. A critical interview with the client should reveal:
 - 1. His preferred method of meeting entrepreneurial risk
 - 2. His preferred method of personnel compensation

- 3. His style of value decision trade-offs between qualitative and quantitative issues
- 4. His perception of his risk position and his risk utility "curve"
- 5. His personal non-business objective
- VI. Structuring Market Data Analysis With Models
 - A. Creating devices which will discard most data and logically relate the rest.
 - 1. Models explain what you are going to do
 - 2. Models explain relationships and key assumptions
 - Models permit client to test his own assumptions for a range of alternative outcomes
 - B. Demonstration of converting weekend skiing demand to motel room quantities at a specific resort (See Illustration next page)
 - C. Conversion of highway traffic to historical exhibit admissions (See chart Flow Diagram, page 40)

SKIER HOTEL ROOM DEMAND MODEL

P x R x T x D = PR x MS = Rooms per Average Weekend Day

where:

- P = Total population for counties in the overnight trade area.
- R = Skier Participation rate on the average Vinter Sunday.
- T = For All skiers the average number of overnight skiing trips.
- D = Average length (days) of overnight skiing trips.
- MS = Market Share (%) of weekend skiers that the Wintergreen motel can capture.
- PR = Number of people staying in each room of motel.

Total population Average Sunday trips days for surrounding x .0046 participation x .9 per 1.86 per counties rate year trip

Three conservative rooms per people x 2.5% market 208 average weekend per room share day

FEASIBILITY ANALYSIS - AFTERNOON SESSION

- 1. Market Segmentation and Identification
 - A. Real estate enterprise uses small micro markets and the merchandising assumptions are the critical elements of feasibility.
 - B. First name the typical revenue unit or method of measuring profit per sales unit
 - 1. Per acre
 - 2. Per apartment
 - 3. Per event
 - C. Then identify the customer units who signs the check the doctor or the clinic? The ticket buyer or the promoter? The salesman or the firm? The manager or the vice president?
 - D. Devices for generating a prospect list or spotting customers
- II. The Customer Profile and Consumer Survey
 - A. Scaling the market with a body count and opportunity gaps
 - B. Classifying the body count by preferences
 - C. Study of the competition to define the competitive standard and supply gaps
 - D. Surveying the consumer to identify a competitive differential
 - E. The objective is to define a product and price with monopoly characteristics in order to control variance in absorption rates
 - F. Refer to Consumer Survey Questionnaire (Landmark Research)
 - G. Direct mail and phone call techniques
- III. Pre-Architectural Programming
 - A. The theme and market target
 - B. Product size mix and price
 - C. Product features by competitive standard and competitive edge
 - D. Megative market factors to be neutralized by design
 - C. Harketing-investment trade-offs
 - IV. Structuring the Financial Analysis
 - A. Comparison of critical income valuation assumptions for three view-points in real estate (See Chart)
 - B. Assumptions for a time line of analysis

- C. Assumptions for profit centers
- D. The back door approach as a preliminary analysis
- E. The front door approach
- V. Modeling Cash Flow Simulation
 - A. Refer to chart of Systematic Estimation of Annual Income
 - B. Refer to suggested outline of cash analysis for land development project
 - C. Review basic elements of mini-mod output
- VI. Measuring Rate of Return
 - A. "Going-in" equity or liquidating equity?
 - B. What to include in financial returns?
 - C. What is the reinvestment assumption?
 - 1. Inwood discounting
 - 2. The internal rate of return
 - 3. The modified internal rate of return
 - D. Total dollars vs rate reader viewpoint
- VII. Risk Evaluation
 - A. Equity payback period
 - B. Default ratio or cash break-even point
 - C. Sensitivity point for cost over-run or under-absorption
 - D. Required market segment as percent of total market opportunity

November 10, 1971

Landmark Research Tu

Dear Resident:

Thomas L. Turk

James A. Grasskamp

One of our clients is considering the development of several recreational'"second home" projects in the form of condominium units set among recreational complexes which include golfing, marina, and winter sport facilities. A key element of each plan is a resort-inn with complete facilities, which would make available grounds maintenance, maid service, catering, and year round indoor sports facilities to condominium owners.

These resort-inns are already established summer resorts and popular off-season centers for business meetings and seminars. The key question is whether families are thinking about the four-season recreational pattern that is developing in wisconsin and whether sophisticated family planners are thinking in terms of purchase of a recreational home in their favorite summer vacation area.

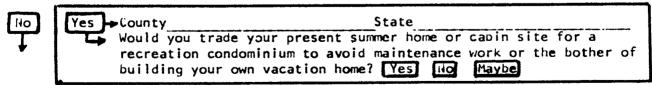

Wisconsin may be thought of as the place for inexpensive summer vacations while winter outings are in the South. However, investment in a second home would suggest year round use and enjoyment and a mix of seasonal activities. To survey attitudes about vacations, Wisconsin recreation centers and condominiums we have constructed a mailing list of selected people of means, who have demonstrated sophisticated tastes in recreation. Would you please answer the following brief questions? There is no way to identify a response and this letter is not a sales promotion.

Professor James A. Graaskamp

1. Does your family generally vacation each year in Wisconsin?

МО								r of weeks during which you referred location.					
•	Circle Most Preferred Location												
	Winter	ī	2	3	4	5	6+						
	Spring	1	2	3	4	5	6+						
	Summer	1	2	3	4	5	6+						
	Fall	1	2	3	4	5	6+						

2. Do you presently own a summer home or cabin site?

- 3. Would you prefer a secluded informal "get away from it all" weekend retreat to a better equipped more active social center? Yes No
- 4. Would you ever consider purchase of a carefree condominium in the heart of a recreational complex?

	No What is your main reason?
\	if No, stop here and return the questionnaire. Thank you.

5.	retreat	would consider purchase of a ca , which of the following locati Check only <u>one</u> in each column	ons would you most
